

Trumbauersville Borough Council

March 8, 2025,

EMERGENCY Council Meeting Minutes

3:57 PM

Council Members Present: Chris Betz, Mike George, Amanda Hahn, and Rebecca Spor

Mike confirmed that water pressure went low before 3 pm on March 7, 2025. He went to the well house and noted the pump was not running. He attempted to restart the pump, but it did not restart. Rick Raab (well contractor) arrived and confirmed that the starter motor for the pump was burned out and that the pump cannot be restarted and run and requires replacement, which was already planned for later this month.

We acknowledged that the water supply interconnect was opened and that the borough is receiving water from MTWA. Council members in attendance unanimously agreed that an emergency exists and authorized the expenses necessary to expedite repairs to restore water to the borough from our well and infrastructure. They also authorized the cost of the metered water supplied to the borough by MTWA until such repairs are made.

The meeting adjourned at 4:01 pm.
